DATASET INFORMATION

Dataset Description

1. Dataset Overview

The dataset is an object detection dataset containing images of different types of vehicles. It consists of 6 vehicle classes:

Class ID	Vehicle Class
0	Car
1	Threewheel
2	Bus
3	Truck
4	Motorbike
5	Van

The dataset is organized into three subsets: training, validation, and testing.

The dataset configuration is defined in the data.yaml file as follows:

- Number of classes: 6
- Training images: 2,100
- Validation images: 450
- Testing images: 450
- Total images: 3,000

2. Dataset Split

The dataset is divided into training, validation, and testing sets using a 70:15:15 ratio.

Dataset Split	Number of Images	Percentage
Training	2,100	70%

Validation	450	15%
Testing	450	15%
Total	3,000	100%

3. Training Dataset

The training set contains 2,100 images and 2,100 corresponding label files.

The distribution of annotated objects across the six classes is:

Class	**Number of Objects**
Car	443
Threewheel	470
Bus	420
Truck	440
Motorbike	487
Van	380

4. Validation Dataset

The object distribution is:

Class	Number of Objects
Car	106
Threewheel	124
Bus	86
Truck	89
Motorbike	110
Van	68

5. Test Dataset

The test set contains 450 images and 450 corresponding label files.

The object distribution is:

Class	Number of Objects
Car	113
Threewheel	115
Bus	82
Truck	100
Motorbike	102
Van	100

Image Dimension Summary

Image Size (Width × Height)	Number of Images
320 × 240	194
500 × 375	130
640 × 480	120
390 × 280	117
500 × 333	61
400 × 267	44
640 × 426	38
1280 × 720	34
550 × 367	33
600 × 450	33
